

EXPERIENCE

Ethical Hacking & Penetration Testing Intern	Jun 2025 – Jul 2025
<i>C-DAC</i>	Remote
- Executed network and web-based VAPT on enterprise infrastructures. - Identified 30+ vulnerabilities using Nmap, Metasploit, and Wireshark. - Authored OWASP-aligned remediation reports, enabling the patching of critical vulnerabilities and significantly reducing risk exposure.	
Cybersecurity & Digital Forensics Intern	Apr 2025 – Jun 2025
<i>Academy of Skill Development</i>	Kolkata, IN
- Conducted VAPT and in-depth forensic analysis using tools like Volatility and Autopsy on compromised test environments. - Assessed attack patterns to implement system hardening and risk reduction.	
Cybersecurity Internship (Python Focus)	Dec 2022 – Jan 2023
<i>Ardent Computech Pvt. Ltd</i>	Kolkata, IN
- Developed Python-based tools for network scanning and log analysis. - Simulated exploitation scenarios in Linux to analyze system weaknesses.	

PROJECTS

ThreatWeaver: Zero Trust Security Engine
<i>Python, JavaScript, Shell, Active Directory, Machine Learning, RAG</i>
- Built an AI-driven threat detection pipeline that transforms Active Directory logs into structured threat intelligence using Isolation Forest anomaly detection and Retrieval-Augmented Generation (RAG)-based LLM analysis. - Integrated MITRE ATT&CK mapping for standardized adversarial technique classification and evidence-based security reporting. - Developed automated log ingestion, enrichment, and summarization modules to accelerate SOC analyst triage and incident investigation workflows.
Secure File Storage System
<i>Flask, MongoDB, AES-256, RBAC</i>
- Deployed a secure file storage server on a Linux VPS using Nginx, featuring AES encryption and 2FA. - Developed blockchain-based audit logs to ensure record immutability. - Integrated Role-Based Access Control (RBAC) and real-time security alerts.
Phishing Defense Simulation Toolkit
<i>Python</i>
- Created a toolkit to simulate phishing vectors and evaluate organizational defenses. - Implemented detection algorithms and designed user-awareness protocols.

TECHNICAL SKILLS

Tools & Infrastructure: Nmap, Burp Suite, Wireshark, Metasploit, Active Directory
Programming: Python, JavaScript, Shell, SQL
Environments: Kali Linux, Windows
Domains: VAPT, Digital Forensics, Web Security, Zero Trust, MITRE ATT&CK, OWASP Top 10

EDUCATION

M.Tech, Cyber Forensics & Information Security	Oct 2024 – Jun 2026
<i>College of Engineering Kallooppara, IN</i>	CGPA: 8.15 (In Progress)
B.Tech, Computer Science & Engineering	Oct 2020 – Jun 2024
<i>School of Engineering and Technology, Dimapur, IN</i>	CGPA: 7.42

ACTIVITIES & CERTIFICATIONS

Coordinator, Techaura 2023	Organized technical events for 100+ participants.
Participant, TryHackMe Advent of Cyber 2025	Completed 24 security challenges.
Certifications	Cybersecurity Job Simulations: PwC Switzerland & ANZ Australia.
