

AKASH SARKAR

Krishnanagar, IN | +91-8900022999
i.am.akash.sarkar.2001@gmail.com

PROFILE

Cybersecurity postgraduate specializing in Vulnerability Assessment and Penetration Testing (VAPT), Web Security, Digital Forensics, and Active Directory Security. Hands-on experience with Kali Linux, Nmap, Metasploit, Burp Suite, and Wireshark, identifying and documenting 30+ security vulnerabilities in enterprise environments. Developed secure systems using Python, Flask, AES encryption, RBAC, and blockchain-based audit logging. Passionate about threat detection, incident analysis, and Zero Trust security models.

TRAINING & INTERNSHIPS

Centre for Development of Advanced Computing (C-DAC) | Remote Ethical Hacking and Penetration Testing Internship | 06/2025 - 07/2025

- Performed enterprise-level VAPT across network and web environments.
- Identified and documented 30+ high/medium-risk vulnerabilities using Nmap, Metasploit, and Wireshark.
- Prepared remediation reports aligned with OWASP Top 10 and industry best practices.

Academy of Skill Development | IN, Kolkata Cybersecurity and Digital Forensics Internship | 04/2025 - 06/2025

- Conducted live VAPT and forensic investigations on compromised systems.
- Analyzed attack patterns and recommended security hardening measures to reduce risk exposure.

Ardent Computech Pvt. Ltd | IN, Kolkata Cybersecurity and Ethical Hacking using Python Internship | 12/2022 - 01/2023

- Built Python tools for network scanning, log analysis, and vulnerability detection.
- Simulated real-world attack scenarios in Linux to study exploitation techniques.

PROJECTS

ThreatWeaver — Correlated Zero Trust security engine (Ongoing) [\[Link\]](#)

- Developed a Python-based pipeline to transform raw Active Directory log telemetry into structured, explainable threat intelligence using ML anomaly detection and behavioral rules.
- Integrated MITRE ATT&CK mapping and constrained-AI reporting to produce evidence-backed, analyst-friendly alerts and automated summaries.
- Built and optimized end-to-end ingestion, enrichment, and reporting components (Python/JavaScript/Shell) focused on interpretability, forensic evidence preservation, and faster triage.

Secure File Storage with Access Control [\[Link\]](#)

- Designed and deployed a secure file storage system on a Kali Linux VPS using Flask and MongoDB.
- Implemented Role-Based Access Control (RBAC), Two-Factor Authentication (2FA), AES encryption, and blockchain-based immutable audit logs.
- Enabled user-level isolation with secure file access and real-time alerting.

Phishing Techniques Research & Simulation [\[Link\]](#)

- Developed a Python toolkit to simulate phishing attacks and test defenses.
- Implemented detection mechanisms and user-awareness countermeasures.

SKILLS

Python, SQL, Kali Linux, Nmap, Burp Suite, Wireshark, Metasploit, Acunetix, Active Directory, Web Application Security, VAPT, Network Security, Digital Forensics

EDUCATION

College of Engineering Kallooppa | Pathanamthitta, IN
M.Tech | Cyber Forensics & Information Security | 06/2026
CGPA: 8.15/10 (In Progress)

School of Engineering and Technology | Dimapur, IN
B.Tech | Computer Science & Engineering | 07/2024
CGPA: 7.42/10

CERTIFICATIONS

Cybersecurity Job Simulation PwC Switzerland, Cybersecurity Management ANZ Australia

LEADERSHIP & ACTIVITIES

- **Coordinator, Techaura 2023** — Led and organized technical events with 100+ participants.
- **Participant, BSides Kerala 2025** — Engaged with industry professionals on threat intelligence and security trends.
- **Participant, TryHackMe Advent of Cyber 2025** — Completed 24 hands-on cybersecurity challenges.
